

Integrasi Google Calendar Lavavel Spatie

1. Create Credentials

a. pilih project google

b. Enable Api Google Calendar

Google APIs Test

API Library

Google Calendar API

Google

Integrate with Google Calendar using the Calendar API.

ENABLE TRY THIS API

Type
APIs & services

Last updated
13/09/2019, 01:05

Category
G Suite

Service name
calendar-json.googleapis.com

Overview

The Calendar API lets you display, create and modify calendar events as well as work with many other calendar-related objects, such as calendars or access controls.

About Google

Google's mission is to organize the world's information and make it universally accessible and useful. Through products and platforms like Search, Maps, Gmail, Android, Google Play, Chrome and YouTube, Google plays a meaningful role in the daily lives of billions of people.

Tutorials and documentation

[Get Started with the Calendar API](#)

Here are a few ideas for getting started with the Google Calendar API.

[Calendar API Reference](#)

To look up a particular resource type or method, see the Reference.

Maintenance & support

Ask questions on Stack Overflow with the google-calendar tag.

APIs Credentials

You need credentials to access APIs. [Enable the APIs that you plan to use](#) and then create the credentials that they require. Depending on the API, you need an API key, a service account or an OAuth 2.0 client ID. For more information, see the [authentication documentation](#).

Create credentials

API key
Identifies your project using a simple API key to check quota and access.

OAuth client ID
Requests user consent so your app can access their data.

Service account key
Enables server-to-server, app-level authentication using robot accounts.

Help me choose
Asks a few questions to help you decide which type of credential to use

Google APIs Test

Create service account key

Service account

New service account

Service account name: test Role: Select a role

Service account ID: test-503 @sunlit-apricot-255115.iam.gserviceaccount.com

Key type

Downloads a file that contains the private key. Store the file securely because this key cannot be recovered if lost.

☒ JSON Recommended

☐ P12 For backward compatibility with code using the P12 format

Create Cancel

Simpan File JSON nya, pindahkan file json tersebut ke /storage/app/google-calendar dan rename nama file menjadi “**service-account-credentials.json**”

2. Integrate With Google Calendar

- Pergi ke google calendar lalu setting, dan cari “Settings for my calendars”. klik akun calendar yang ingin dipakai, lalu,

Settings
